

CONTRIPON WP-L

Defoamer

Chemical composition

Silicone oil emulsion

Aspect:	viscous, white
Ionogenicity:	non-ionic
pH (10%):	approx. 7 - 8
Stability:	not stable in the strongly alkaline range
Solubility:	can be easily diluted in water
Storage stability:	up to 12 months when properly stored
	Protect from frost!
	Mix thoroughly before use.

Properties

CONTRIPON WP-L is very easy to apply.

The product is highly effective. Even small amounts reduce the foam substantially and reliably. It is advisable to prepare stock solutions in a ratio of 1 : 3 to 1 : 5.

Application

The quantities to be used are different depending on the individual tanneries, however, they should be as small as possible.

A very good effectiveness is obtained when the product is added in several portions. The addition of CONTRIPON WP-L as weak solution has proved successful. Overdosing should be avoided.

The above results have been obtained from trials in our laboratory and plant. In the light of changing conditions they can serve only as a guide and are therefore offered without obligation. We ask you to observe the possible rights of third parties.
