

CONTRIPON WP-L

Highly effective defoamer, lustring agent

Chemical composition

Silicone oil emulsion

Aspect:	viscous, white
Ionogenicity:	non-ionic
pH (10%):	approx. 7 - 8
Stability:	not stable in the strongly alkaline range
Solubility:	readily soluble in water
Storage stability:	up to 12 months when properly stored
	Protect from frost!
	Stir well before use.

Properties

CONTRIPON WP-L is a highly effective defoamer based on silicone. Due to the high effectiveness only small amounts are necessary.

CONTRIPON WP-L used in the ironing lustre for furskins, imparts an excellent shine to the wool/hair.

CONTRIPON WP-L is very easy to apply.

As all defoamers based on silicone, CONTRIPON WP-L can influence the fogging values of automotive leathers.

Application

Before being added to the float, CONTRIPON WP-L is diluted with water in a ratio of 1 : 10 to 1 : 15.

Quantities

The applied quantities should be as low as possible. It is advisable to add CONTRIPON WP-L in several portions. Overdosage should be avoided.

In the ironing lustre for fur skins: up to 30 g/l

The above results have been obtained from trials in our laboratory and plant. In the light of changing conditions they can serve only as a guide and are therefore offered without obligation. We ask you to observe the possible rights of third parties.
