

DOLATAN FL

Liquid tanning agent for fur dressing

Chemical composition

Based on phenol condensation product

Aspect:	liquid, light-brown
Active matter:	approx. 40 %
Ionogenicity:	anionic
pH (10%):	approx. 3
Stability:	sufficiently stable to the chemicals usually applied for fur dressing
Solubility:	mixable with water in any ratio
Storage stability:	up to 12 months when properly stored

Properties

DOLATAN FL can be added undiluted to the float.

DOLATAN FL is used alone or in combination with other tanning agents. If used alone, a light, almost white leather with good softness, fullness and a mild, full touch results.

The leather side can be buffed and dyed easily.

In combination with chrome salts the colour is substantially lightened.

Application

Quantities:

- Combined tannage: 4 - 6 ml/l DOLATAN FL
- Used as solo tanning agent: up to 12 ml/l DOLATAN FL

The above results have been obtained from trials in our laboratory and plant. In the light of changing conditions they can serve only as a guide and are therefore offered without obligation. We ask you to observe the possible rights of third parties.
