

OXETAL A 125

Basic material for the manufacture of washing and cleaning agents

Chemical composition

Fatty acid monoethanolamide polyglycol ether

Appearance: yellow-beown liquid
Ionic character: nonionic

Typical data

Active ingredient: 100 %
Solubility: soluble in water

Application

OXETAL A 125 is used as a mild component of washing and cleaning agents or as an effective wetting agent in technical applications. It is also an effective emulsifier for essential oils. OXETAL A 125 is compatible with hard water conditions and stable in acidic and alkaline pH ranges and also compatible with anionic, nonionic, cationic and amphoteric surfactants.

Storage

Storage at low temperatures may cause turbidity or solidification which can be removed by gentle heating.

The above results have been obtained from trials in our laboratory and plant. In the light of changing conditions they can serve only as a guide and are therefore offered without obligation. We ask you to observe the possible rights of third parties.
