

OMBRELLON WRT

**Special product for the hydrophobing of shoe upper leathers
with very good maeser and bally test values**

Chemical composition

Water-insoluble hydrophobic oils

Aspect :	liquid, colourless
Active matter:	approx. 100 %
Solubility:	not emulsifiable in water, can be diluted with IPA or similar solvents
Storage stability:	The product can be stored up to one year in the original sealed packing. Recommended process temperature if used alone: 20 - 30°C

Properties

OMBRELLON WRT can clearly improve the hydrophobing values by adding the product to the hydrophobing agents in the drum or for the single use on the roller-coater.

Proportionally used OMBRELLON WRT results in highly water-repellent leathers which are softer and have a pleasant smooth touch. Suede fibres have more gloss, the deepness of the colours are visibly improved. OMBRELLON WRT is light and heat resistant.

Application

In the drum

The percentages refer to the shaved weight.

- *Heavy hydrophobic shoe upper leathers (military leathers, boots types)*

1. rate normal hydrophobing with OMBRELLON types
2. rate depending on the added hydrophobing agents
up to 50.0 % OMBRELLON WRT
to the normally used hydrophobing agent.

- *Hydrophobic shoe upper leathers*

Additions of: 10.0 - 25,0 % OMBRELLON WRT
to the normally used hydrophobing agent

- *Roller-Coater:* Amounts have to be adjusted individually.

The above results have been obtained from trials in our laboratory and plant. In the light of changing conditions they can serve only as a guide and are therefore offered without obligation. We ask you to observe the possible rights of third parties.
