

LEATHER AUXILIARIES

AUTOMOTIVE LEATHER

The right product for every task

ZSCHIMMER & SCHWARZ

AUTOMOTIVE LEATHER

The right product for every task

In the true sense of the word we set the tone with our manifold experimental possibilities.

Our application technicians have the perfect pitch. They are listening to our customers, which tasks they face and which solutions are required. Professional skill in leather technique and chemistry as well as an application laboratory on the highest level result in product innovations that withstand even the hardest conditions of a running production at our customer's site.

A low temperature vacuum dryer as well as an electronically controlled milling drum with a humidity control system belong to the fundamental equipment of our experimental tannery. All test series are run close to the production standard and are evaluated with a special designed computer software.
