A FAMILY BUSINESS WITH A GLOBAL FORMULA FOR SUCCESS

Zschimmer & Schwarz is a global supplier of chemical auxiliaries and specialties headquartered in Lahnstein near Koblenz, Germany. The family business was founded in Chemnitz in 1894 and is positioned across industries with different business divisions. The company develops, produces and distributes tailor-made chemical auxiliaries for the leather, fur, ceramic, textile and chemical fibre industries. Manufacturers of cleaning agents, personal care products, paints and coatings, lubricants and industrial applications all over the world trust the company's chemical specialties as well. The corporate group Zschimmer & Schwarz comprises 28 companies in 16 countries on five continents, 20 of which have their own production facilities.

The Personal Care Division of the company is dedicated to developing new solutions for skin and hair care, colour cosmetics and toiletries. An extensive portfolio, a strong focus on service, flexibility and responsible stewardship of the environment make Zschimmer & Schwarz your perfect partner for creating personal care products that the markets desire.

We have bundled our expertise and know-how in competence centres. Developing projects from the first idea to the final solution, all of them offer application support and generate ideas backed by constant market analysis. Thanks to a constant exchange of knowledge, the different geographical locations and the individual fields of expertise of our competence centres, our experts can advise multinationally operating customers on trends for different markets.

OUR COMPETENCE CENTRES

HAIR & SKIN PREMIUM (LAHNSTEIN, GERMANY):

Our ZETESAP line is the perfect basis for soap-free cleansing bars, and our LUMOROL surfactant blends allow our customers to produce sophisticated rinse-off formulations such as mild shampoo or shower gel. With our focus on multi-functionality and efficiency, we develop tailor-made specialties and formulate premium and luxury products to meet ever-changing market requirements.

SKIN CARE (TRICERRO, ITALY):

Thanks to our skin care portfolio – from the high-quality ZETEMOL emollients to the sophisticated emulsifiers of the SEBUMOL (W/O) and PROTELAN (O/W) product lines – we develop formulations that help our customers create the desired features of a cosmetic product.

COLOUR COSMETICS (WISSEMBOURG, FRANCE):

The high-performance polymers of our SYNTRAN® line and our first-class ZETEMOL emollients are functional ingredients that help our customers create perfect advanced make-up formulations.

EMULSIFIERS

The pleasant skin sensation as well as the stability of cosmetic emulsions like hand cream, body lotion or serum strongly depend on the formulation's emulsifier system. Our MULSIFAN, PROTELAN and SEBUMOL product lines offer formulators a wide-ranging portfolio of solutions to satisfy virtually all of their needs.

SOLUBILISERS

Solubilisers are used to produce clear aqueous solutions of different oils. Thus, they allow you to choose the perfect match of oil components to create the desired sensorial effect, such as a fragrance or a specific skin feel.

EMULSIFIERS

HOT PROCESS

TRADE NAME	INCI	ACTIVE MATTER [%]	CLASSIFICATION	PHYSICAL FORM @ 25 °C
PROTELAN				
PROTELAN ENS - RSPO - MB	Glyceryl Stearate, Cetearyl Alcohol, Stearic Acid, Sodium Lauroyl Glutamate	100	Anionic	Flakes
PROTELAN ESG	Glyceryl Stearate, Cetearyl Alcohol, Sodium Stearoyl Glutamate	100	Anionic	Flakes
PROTELAN NMF	Glyceryl Stearate, Cetearyl Alcohol, Sodium Lauroyl Glutamate, Sodium Stearoyl Lactylate	100	Anionic/Nonionic	Flakes
MULSIFAN				
MULSIFAN CB	Beheneth-10	100	Nonionic	Wax
MULSIFAN CCA 22	Ceteareth-22	100	Nonionic	Wax
MULSIFAN CGM 165	Glyceryl Stearate, PEG-100 Stearate	100	Nonionic	Pellets
MULSIFAN CLA 09 PH	Laureth-9	100	Nonionic	Paste
MULSIFAN COL 20	Cetoleth-20	97	Nonionic	Wax
MULSIFAN CPA	Laureth-4	100	Nonionic	Liquid
MULSIFAN CSA 02	Steareth-2	100	Nonionic	Pellets
MULSIFAN CSA 20	Steareth-20	100	Nonionic	Pellets
MULSIFAN CSA 21	Steareth-21	100	Nonionic	Pellets
SEBUMOL				
SEBUMOL PGPR	Polyglyceryl-3 Polyricinoleate	100	Nonionic	Liquid
SEBUMOL WO 300	Polyglyceryl-3 Polyricinoleate, Polyglyceryl-4 Oleate, Propanediol	100	Nonionic/Anionic	Liquid

EMOLLIENTS

Emollients are the heart of cosmetic preparations and influence skin feel as well as the overall product performance. Our comprehensive range of emollients offers different solutions to create unique textures and to enhance the emolliency as well as the hydration properties of leave-on preparations. In make-up formulations, our emollients help to improve pigment wetting as well as film-forming and colour development properties.

EMOLLIENTS

TRADE NAME	INCI	ACTIVE MATTER [%]	CLASSIFICATION	PHYSICAL FORM @ 25 °C
OXYPON				
OXYPON 288	PEG-10 Olive Glycerides	100	Nonionic	Liquid

Excellent emollient and good sunscreen solubiliser		▲		▲	▲	▲		

SURFACTANTS

SPECIAL MILD SURFACTANTS

Customers are no longer looking for cleansing only – they want multi-benefit products. When extra mild, gentle and skin- or hair-friendly cleansing is required, formulators can find plenty of solutions within our PROTELAN and LUMOROL product lines. We offer a wide range of COSMOS-certifiable ingredients, products which are highly natural as well as different foaming systems for a perfect sensory perception.

SPECIAL SURFACTANT BLENDS

Once a decision has been made in favour of either a bath oil or a shower oil, the focus – apart from cleansing – is on skin care. With their special composition of powerful emulsifiers and high-quality oils, shower and bath oils create an unforgettable care and wellness experience.

Thanks to our LUMOROL range, customers can design extra mild formulas with a high amount of oil that can be easily incorporated. As a result, the final product leaves the skin soft and moisturised after showering.

LUMOROL LA-B	Ammonium Lauryl Sulfate, Ammonium Laureth Sulfate	23	Anionic	Liquid
SEBUMOL				
SEBUMOL B 1000	Polyglyceryl-3 Polyricinoleate, Polyglyceryl-3 Diisostearate, Sulfated Castor Oil, Polyglyceryl-3 Caprate	100	Nonionic/Anionic	Liquid

PROPERTIES	APPLICATIONS						CERTIFICATIONS	
	CLEANSING	SKIN CARE	HAIR CARE	BABY CARE	SUN CARE	COLOUR COSMETICS	COSMOS	RSPO
Ready-to-use blend based on ultra-mild surfactants	▲		▲	▲				
Surfactant blend creating stable lather with fine bubbles; good skin and eye compatibility	▲		▲					
Water-free surfactant blend for oil shower formulations; dilution with water creates O/W emulsion	▲		▲					▲
Highly concentrated and easy-to-dissolve surfactant blend with excellent foaming properties; easy to thicken by adding sodium chloride	▲		▲					▲
Mild surfactant blend with excellent foaming properties; very mild to the skin	▲		▲	▲				
Blend of anionic and nonionic surfactants for oil showers	▲		▲					▲
Highly concentrated and easy-to-dissolve surfactant blend with excellent foaming properties	▲		▲					
SLES- and PEG-free surfactant blend with good foaming properties and viscosity control	▲		▲	▲				
Ready-to-use blend based on ultra-mild surfactants	▲		▲	▲				
Ready-to-use blend based on ultra-mild surfactants	▲		▲				▲	
Blend of primary surfactants	▲		▲	▲				
PEG-free blend for oil bath formulations with an intensive caring effect on the skin; helps to solubilise vegetable and/or synthetic oils	▲			▲			▲	

SYNDETS

Although syndet bars look like traditional soap bars, their composition differs completely, and they provide different properties as well as a variety of advantages. ZETESAP syndet bases are designed to impart specific properties like mildness, rinsability or lathering to the formulation and allow to adjust the pH value to be more compatible with the skin.

SYNDETS

TRADE NAME	INCI	ACTIVE MATTER [%]	CLASSIFICATION	PHYSICAL FORM @ 25 °C
ZETESAP				
ZETESAP 813 P* **	Disodium Lauryl Sulfosuccinate, Sodium Coco-Sulfate, Triticum Vulgare (Wheat) Starch, Cetearyl Alcohol, Paraffin, Titanium Dioxide	50	Anionic	Pellets
ZETESAP 900* **	Disodium Lauryl Sulfosuccinate, Sodium Coco-Sulfate, Triticum Vulgare (Wheat) Starch, Cetearyl Alcohol, Hydrogenated Palm Glycerides, Lauryl PCA, Glyceryl Stearate, Titanium Dioxide	50	Anionic	Pellets
ZETESAP 915 CS - RSPO - MB	Sodium Coco-Sulfate, Sodium Cocoyl Glutamate, Distarch Phosphate, Cetearyl Alcohol, Hydrogenated Palm Glycerides, Glyceryl Stearate	45	Anionic	Pellets
ZETESAP C 11	Propylene Glycol, Aqua (Water), Sodium Stearate, Sodium Laureth Sulfate, Sorbitol, Glycerin, Sodium Laurate, Etidronic Acid	80	Anionic	Solid
ZETESAP NATURAL WAX*	Disodium Lauryl Sulfosuccinate, Sodium Coco-Sulfate, Triticum Vulgare (Wheat) Starch, Cetearyl Alcohol, Rhus Verniciflua Peel Wax, Lauryl PCA, Glyceryl Stearate, Titanium Dioxide	50	Anionic	Pellets

* Product also available without Titanium Dioxide

** Soon available as "RSPO MB" version

THICKENERS

Thickeners are used in almost all common cosmetic formulations to achieve the desired viscosity of the final product.

For standard as well as sophisticated formulations, we recommend our OXETAL range as a very efficient solution for polymeric thickening. This product line provides viscosity building across a wide variety of surfactant systems.

THICKENERS

TRADE NAME	INCI	ACTIVE MATTER [%]	CLASSIFICATION	PHYSICAL FORM @ 25 °C
OXETAL				
OXETAL SE	PEG-90 Glyceryl Isostearate, PEG-6 Caprylic/Capric Glycerides, Laureth-2	83	Nonionic	Liquid
OXETAL VD 20	Laureth-2	100	Nonionic	Liquid
OXETAL VD 92	PEG-90 Glyceryl Isostearate, Laureth-2	77	Nonionic	Liquid
PURTON				
PURTON CFD	Cocamide DEA	85	Nonionic	Liquid
PURTON CFM/F	Cocamide MEA	Min. 86	Nonionic	Flakes
PURTON CM/20	Cocamide MEA, Sodium Laureth Sulfate	40	Nonionic	Paste
PURTON SFD	Soyamide DEA	87	Nonionic	Liquid

POLYMERS

Our water-based acrylate polymer technologies are incorporated in decorative cosmetics, skin care products, hair care products and toiletries. Each polymer dispersion improves the properties of a formula in a variety of ways. Our core competence is the development of characteristic key properties which are mandatory for the formulation of high-performance make-up products, such as wear resistance, water resistance and transfer resistance.

POLYMERS

FUNCTIONAL INGREDIENTS

In addition to classic ingredients, functional ingredients are used in cosmetics to enhance the formulation and the feeling on the skin. Functional ingredients are opacifiers and pearlescent agents as well as humectants and skin conditioners. They lend a high-quality appearance to formulations, improve skin moisture or create a silky, well-groomed feeling on the skin during and after application.

Our portfolio offers humectants such as the GLYCERINE line, opacifiers from the SYNTRAN® and OPACIFIER ranges, pearlescent agents from the PEARLAGENT line and conditioners from the PROTELAN range. By enhancing its appearance, these products underline the value of your formulation.

FUNCTIONAL INGREDIENTS

SALVONA

OUR PARTNERSHIP FOR MICROENCAPSULATION
TECHNOLOGY FOR FUNCTIONAL INGREDIENTS

TINY SPHERES. HUGE IMPACT.

Based in Hamilton, New Jersey, USA, Salvona develops innovative technologies for personal care and dermacosmetics. Since 2012, Zschimmer & Schwarz has been a minority shareholder of Salvona in order to extend the product portfolio of both companies.

As a technology-based company, Salvona's focus is on supporting entrepreneurs, brands and manufacturers of finished products with innovative solutions to make their products stand out by being more effective, attractive and successful.

The company's core competency is developing and manufacturing functional solutions in liquid and fine powder forms containing microencapsulated functional ingredients.

Salvona's products are made of natural ingredients from sustainable sources. The company offers solutions that enable the use of functional ingredients in the most effective and creative ways in a variety of product forms. In addition to its advanced technologies, Salvona also supports clients with marketing positioning and claims to help them grow their market share.

Salvona's offerings include standard and customised solutions, all of which are manufactured in a state-of-the-art cGMP facility utilising environmentally friendly processes, solar energy and water restrictions.

THE 3 BASIC TECHNOLOGY PLATFORMS INCLUDE:

SalSphere

This microsphere system for liquids can be used to protect and stabilise functional ingredients, adhere them to the skin and slowly release them to either the surface or deeper layers of the skin.

MultiSal

This encapsulation method can be used for dry, anhydrous or wet products. It stabilises functional ingredients, reduces evaporation and odour, releases different agents consecutively, enhances solubility, aids in stabilising functional ingredients in high-temperature processing conditions and responds to moisture – to name but a few of its benefits.

HydroSal

This is a tool to use when functional ingredients need to be delivered on a wide surface and over time. Its delivery platform (base) is a clear liquid based on water and a hydroalcoholic solution. The time-release technology is triggered and modulated by water.

Visit www.salvona.com for further information.
